LM600-12Bxx, LM600-12Bxx-Q Series

#### **FEATURES**

- Input voltage Range: 176 264VAC or 240 370VDC
- Accepts AC or DC input (dual-use of same terminal)
- Operating ambient temperature range: -20℃ to +60℃
- LED indicator for power on
- Operating up to 5000m altitude
- Over-temperature protection, output short circuit, over-current, over-voltage protection
- Built-in DC fan
- Remote sense function
- 3 years warranty

Céc C € Report

GB4943.1

LM600-12Bxx series is one of Mornsun's enclosed AC-DC switching power supply. It features AC input and at the same time accepts DC input voltage, cost-effective, low no load power consumption, high efficiency and high reliability. These converters offer excellent EMC performance and meet IEC/EN61000-4, CISPR32/EN55032, IEC/UL/EN62368, GB4943 standards and they are widely used in areas of industrial, LED, street light control, electricity, security, telecommunications, smart home, etc.

Note: 1.One magnetic beed should be coupled with the output load line during CE/RE testing.

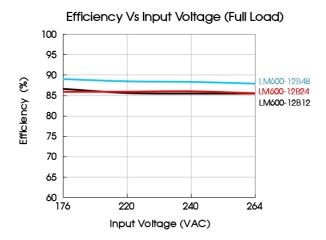

- 2.Matching our filter FC-L10WX series, can meet the higher level of EMC.
- 3.The power supply does not meet the requirements of harmonic current stipulated in EN61000-3-2; This power supply is not suitable for the following situations.
  - 1) The terminal equipment is used in the European Union;
  - 2) The terminal equipment is connected to public mains supply with 220VAC or greater rated nominal voltage that mandatory to meet the requirements of
  - 3) The power supply is installed in terminal equipment with average or continuous input power greater than 75W;
  - 4) The power supply belong to a part of lighting system;
  - In addition, the power supply can be used in the following terminals which do not need to meet EN61000-3-2;
  - (1) Professional equipment with total fixed input power greater than 1000W;
  - (2) symmetrical controlled heating element with rated power less than or equal to 200W.
  - 4. If no harmonic current is required or customers can solve harmonic current problems by themselves, this product can be used.

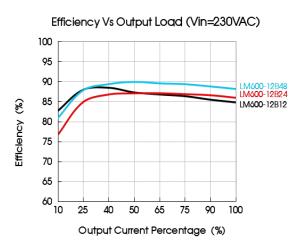

#### **Product Characteristic Curve**

Note: This product is suitable for applications using forced air cooling; for applications in closed environment please consult Mornsun FAE.

### **Dimensions and Recommended Layout**

#### Note:

- For additional information on Product Packaging please refer to www.mornsun-power.com. Packaging bag number: 58220190;
- Unless otherwise specified, parameters in this datasheet were measured under the conditions of Ta=25°C, humidity<75%RH with nominal input voltage and rated output load;
- The ambient temperature derating of  $5^{\circ}$ C/1000m is needed for operating altitude greater than 2000m; 3.
- 4. All index testing methods in this datasheet are based on our company corporate standards;
- 5. In order to improve the efficiency at high input voltage, there will be audible noise generated, but it does not affect product performance and reliability;
- We can provide product customization service, please contact our technicians directly for specific information;
- Products are related to laws and regulations: see "Features" and "EMC"; 7.
- The out case needs to be connected to PE ( ) of system when the terminal equipment in operating;
- Our products shall be classified according to ISO14001 and related environmental laws and regulations, and shall be handled by aualified units;
- The power supply is considered a component which will be installed into a final equipment. All EMC tests should be confirmed with the 10. final equipment. Please consult our FAE for EMC test operation instructions.
